STATE SURVEY FINDS NO DEFICIENCIES AT MASONIC HOME

Plattsmouth, Neb. - The Nebraska Masonic Home in Plattsmouth recently received a deficiency-free survey from the State of Nebraska for both its nursing facility and its assisted living community.

The surveys, conducted by Nebraska Department of Health and Human Services, determined full compliance in the areas of operational care, treatment, and physical plant standards. Both surveys included unannounced on-site inspections.

"Providing loving dignified care and enhancing the quality of life of our residents is our goal at all times," said Executive Director Mary C. Stapp. "This deficiency-free survey illustrates the commitment that The Nebraska Masonic Home team members have to our residents and their families," adds Administrator Mary Vrbka.
